ABOUT ME

Experienced finance professional with a passion for technology and a desire for a career transition. Over the past six months, I've been studying Fullstack development, eager to gain new experiences and start a career in new field. I'm excited about the opportunities that lie ahead and motivated to bring my skills and enthusiasm to the world of software development.

PROJECTS

REST API
(NODE.JS, MONGOOSE, EXPRESS, MONGODB, JOI, MULTER)
(SEP 2023 - OCT 2023)
Created a back end part of the programm for user sign up/sign in/logout, updating user subscription and avatar. Creating/updating contacts for users and filtering them by favourite.

Movie-search
(HTML, CSS, STYLED COMPONENTS, JS, REACT, REACT HOOKS, PARCEL, AXIOS, REST API, REACT ROUTER DOM, REDUX TOOLKIT)
(AUG 2023 -SEP 2023)
An online database of information related to movies.
Available functional: view top-rated and trending movies, search by name and category, add to a watchlist, access detailed overviews, and find similar movies efficiently. The website also provides pagination for managing lists effectively.
Role: developer

Phonebook
(HTML, CSS, MODULE CSS, JS, REACT, REACT HOOKS, PARCEL, AXIOS, REST API, REACT ROUTER DOM, REDUX TOOLKIT)
(AUG 2023)
Created an application for adding/storing contacts. All functional is available after authorisation.
Role: developer
